Shivam Tiwari

Big Data & Hadoop Developer | Apache Spark, Scala, Hive, HDFS | Specialist Software Engineer at Societe Generale | 11+ Years

Greater Bengaluru Area

Summary

Big Data and Hadoop Developer with 11+ years of IT experience, including nearly 8 years of hands-on work designing, developing, optimizing and supporting distributed data-processing solutions on Hadoop (HDFS), Hive and Apache Spark (Scala, Spark SQL). I have delivered data pipelines for banking, telecom and retail clients, including Societe Generale, Verizon, DBS Bank, Citi Bank and IKEA. At Societe Generale I build scalable ETL pipelines across a 4-layer data warehouse (Raw, SRV, BOV, SUV) and automated source-to-target data reconciliation for 7 table-based and 4 file-based sources. What I work with: • Big Data: Apache Spark, Spark SQL, Hadoop, HDFS, YARN, Hive, Sqoop • Languages: Scala, SQL, PL/SQL, Unix/Linux shell scripting • Scheduling and CI/CD: Oozie, AutoSys, Control-M, Jenkins, Git • Practices: ETL, data reconciliation, performance tuning, production support, Agile/Scrum. Recognition: Star Award at Societe Generale (2024); Project Star Award twice at Capgemini (2016, 2018).Open to Big Data, Hadoop, Spark and Data Engineer roles in Mumbai.

Experience

Societe Generale Corporate and Investment Banking - SGCIB

Specialist Software Engineer

December 2022 - Present (4 years)

Bengaluru, Karnataka, India

• Develop scalable ETL data pipelines in Apache Spark, Scala and Spark SQL on the Hadoop (HDFS) ecosystem, processing about 1 GB of data daily.

• Implemented a 4-layer data warehousing architecture (Raw, SRV, BOV, SUV) for data quality, validation and governance.

• Created Hive external partitioned tables and optimized queries for faster analytics and reporting.

• Automated source-to-target data reconciliation (record count checks) for 7 table-based sources and file availability checks for 4 file-based sources.

• Built Jenkins CI/CD pipelines to deploy across DEV, UAT and PROD.

HCL Technologies
Technical Lead
June 2021 - December 2022 (1 year 7 months)
Bengaluru, Karnataka, India

• Verizon (Feb 2022 to Dec 2022): improved a Spark-Scala data pipeline testing framework that compares source data in 4 file formats (CSV, DAT, TXT, JSON) against 3 target types (Hive, Teradata, JDBC).

• DBS Bank, Singapore (Jul 2021 to Feb 2022): generated monthly client reports by consolidating mortgage and loan data with Spark jobs on the Sparkola framework; created Hive table schemas in Collibra.

Wipro Limited
Senior Project Engineer
November 2019 - June 2021 (1 year 8 months)
Bangalore Urban, Karnataka, India

Citi Bank, Singapore

• Ran Sqoop Run Book (SRB) jobs with Unix shell scripts for payments and card services data across 3 regions (APAC, EMEA and GC).
• Designed Hive external tables and views with partitioned columns, and loaded data into staging and final tables.
• Developed wrapper scripts and Spark code to transform source and target tables and files for reporting, and created AutoSys jobs.

Capgemini
Consultant
May 2015 - October 2019 (4 years 6 months)
Bengaluru, Karnataka, India

• IKEA, Sweden (Dec 2018 to Oct 2019): loaded data from RDBMS into HDFS with incremental loads into Hive, wrote Spark SQL queries, ran Spark on YARN and automated the pipeline with Control-M.

• Equinor, Norway (Jul 2015 to Nov 2018): developed SQL scripts, scheduled Control-M jobs and provided post-deployment production support.

Education

Saroj Institute of Technology and Management
Bachelor of Technology, Computer Science · (April 2010 - March 2014)
